SUMMARY

MERN stack developer with 2 years in IT Executive Support, now building secure, scalable web applications. Proficient in Node.js, Express, and RESTful API development with advanced file encryption. Skilled in React, React Query, MySQL, and Knex.js for responsive UIs and optimized data handling. Known for clean architecture, maintainable code, and practical problem-solving. Passionate about learning and delivering impactful, performance-driven solutions in fast-paced tech environments.

TECHNICAL SKILLS

- **Frontend Technologies:** React.js, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap, Material UI
- **Backend Technologies:** Node.js, Express.js, Knex.js,
- **Database Systems:** MongoDB, SQL, PostgreSQL
- **Other Tools:** RESTful APIs, React Query, Postman, Multer, Git, GitHub, Vs code, Sublime

PROJECTS

Param Academy

Developed a full-stack admin dashboard for Param Academy to streamline operations. The platform enables seamless management of student data, course structures, secure document uploads, and performance analytics. Integrated robust backend APIs and a dynamic frontend UI to ensure data accuracy, usability, and scalability for education administrators and staff

Technology Stack: - React, Node.js, Express, MySQL, Knex.js, React Query, Multer

Swachh Bhart Admin Dashboard

Swachh Bharat Abhiyan Application Dashboard - in which user can use it for tracking progress and impact. Stay informed with real-time data on the number of ongoing projects, completed projects, and projects in progress. Monitor the strength of our dedicated volunteers, access budget details, and review project reports. With additional features and insights, this dashboard empowers you to actively engage and contribute towards a cleaner and healthier India.

Technology Stack: - React, Node.js, Express, Mongo DB, Axios,

Weather Application

Created a responsive weather application using a third-party API to deliver live climate updates across global locations. Features include real-time search, dynamic temperature and forecast data, and an intuitive UI. Designed for accessibility and performance, it offers accurate weather insights to support user decisions anytime, anywhere.

Technology Stack: - React, Node.js, Express.js, OpenWeatherMap API, Axios, React Query

Online Ayurvedic Medical Store

Designed a secure, intuitive e-commerce platform for Ayurvedic products as part of a final year diploma project. Customers can seamlessly browse, search, and purchase herbal medicines online. The system emphasizes user experience, product accessibility, and transaction safety, promoting holistic wellness through convenient digital access to traditional remedies.

Technology Stack: - JAVA, MySQL, HTML, CSS, Dream Viewer

Secure File Transferring Android App

This is our final Year Bachelor of Engineering project developed a secure Android application for encrypted file transfer using the Blowfish algorithm, ensuring confidentiality and integrity across mobile devices.

Technology Stack: - PHP, Android, Blowfish Encryption.

EXPERIENCE

IT Executive – SBI Client (Teleperformance Global Services Pvt. Ltd.)

Nov 2023 – Present

Vadodara, GJ

- Supported system upgrades and rollout plans across multiple Sites (Agra, Baroda, Bangalore, Kolkata)
- Maintained documentation for issue tracking, asset records, and escalation logs.
